Career Objective

Android developer with a background in mechanical engineering and a passion for designing and building things which creates a pleasant experience for users through memorable and enjoyable user-centred designs.

Projects

FlickVibes

- Conceptualized, designed, developed and deployed an android application that suggests movies to users based on their feelings using Firebase ML-Vision, MVVM architecture and android architecture components.

Build-It-Bigger

- Developed a joke-telling android application, with free and paid flavours.
- This app uses Google Cloud Endpoints module to fetch data and an Android Library to display the fetched data to the user.

XYZ Reader

- Improved the user experience of this application by, applying material design guidelines to the user interface and effectively used transitions and motion to this app.

Baking App

- Conceptualized, designed and developed a baking app that allows a user to select a recipe and watch video-guided steps for preparing that recipe.
- Implemented the home screen widget to provide quick access to refer recipes.

PopularMovies

- Designed and developed a feature-rich movie guide android application, that lets you discover movies from TMDB.

Education

Udacity

Android Developer Nanodegree, co-created by Google

Nov'18 - Apr'19

Thiagarajar college of Engineering   *CGPA 7.3*

Bachelor of Engineering, Mechanical Engineering

June'14 - May'18

S.R.V. Matric Hr Sec School   *96.6%*

Higher Secondary Education

June'12 - May'14

Experience

Associate Software Engineer

Accenture   **May'18 - Jul'18**

Attended Green Field Training and stream training

Educator

Unacademy (Remote)   **Jul'17 - May'18**

Developed video lessons on Indian polity, generating 20,000+ views.

Honor and Award

Google India Challenge Scholarship

- Selected as one of the 10,000 participants nationwide for learning frontend web development from udacity.

Skills

Proficient	Java, HTML, CSS, Android SDK, Git, Gradle
Moderate	SQL, Adobe XD, Sketch
